There is no higher priority than the safety of Hamilton Center consumers, visitors and staff. In that effort, beginning Friday March 13, 2020, all consumers and visitors will be screened at all locations for COVID-19.

Individuals will be screened, as recommended by the Centers for Disease Control & Prevention, for the following:

- Fever or symptoms of a respiratory infection, such as a cough or sore throat within the last 21 days.
- International travel within the last 14 days to restricted countries. For updated information on restricted countries, visit [www.cdc.gov/coronavirus/2019-ncov/travelers](http://www.cdc.gov/coronavirus/2019-ncov/travelers)
- Contact with someone with known or suspected COVID-19.

Visitors and patients will be directed to use specific public entrances so that they can be properly screened.

In addition, Hamilton Center has enhanced its already stringent processes for cleaning the facilities.

For additional information on this extremely fluid issue, see [Vigo County Health Department Joint Information Center website](https://on.in.gov/COVID19).
